

PIPELINE INTEGRITY FIELD EVALUATIONS

NON-DESTRUCTIVE EVALUATION (NDE) & INSPECTIONS

Audubon Companies provides comprehensive pipeline integrity field evaluations, including non-destructive evaluation (NDE) and ancillary inspections for the energy, utility, and power industries. We are specialists in determining factors causing anomaly formation and anomalies that may threaten a pipeline system. Our extensive experience, training, and cutting-edge technology give our clients a full view of their pipeline assets, enabling them to make better decisions to minimize risk.

Utilizing advanced technologies, we provide robust solutions, documentation, and data to maximize efficiency while maintaining the highest quality standards for safe, accurate, reliable, and repeatable results.

Comprehensive Solutions

- 3D Scanning
- Phased Array Ultrasound
- Guided Wave Ultrasound
- Automated Ultrasound
- Semi-Automated Ultrasound
- Magnetic Particle
- Carbon Equivalency
- Chemical Analysis
- Hardness
- Soil Resistivity
- Soil and Ground Water PH
- Pipe-to-Soil Potentials
- Sub Meter GPS
