

PROJECT PROFILE

BAYOU CARLIN FACILITY

Client: MCMORAN OIL & GAS LLC | Location: ST. MAY PARISH, LA

Audubon provided [project management](#), [construction management](#), I&E [inspection](#), and paint inspection for the Bayou Carlin facility. Our team out-fitted a 195-foot by 35-foot barge with equipment to produce 50 million cubic feet per day (MMCFD) of oil. Audubon also oversaw the installation of an 8-inch, 18,000-foot pipeline with two underground bores—one at 4,800 feet and another at 3,000 feet. Additional services for the shallow water facility included cost tracking, [procurement support](#), and [vendor surveillance](#).

Project Overview

- 50 MMCFD gas facility
- 195 ft. X 35 ft. barge
- Three 1,500 BBLs tanks for oil & water storage
- 18,000 ft. of 8 in. S80 pipeline
- Two underground bores: 4,800 ft. and 3,000 ft.
