

PROJECT PROFILE IN-PLANT ENGINEERING & PROJECT SUPPORT FOR NORCO COMPLEX

Client: **SHELL** | Location: **NORCO, LOUISIANA**

Audubon's [in-plant engineering](#) group provided on-site personnel and [project management](#) services for Shell's [Norco](#) manufacturing complex outside New Orleans, Louisiana. Knowledgeable engineering and project management professionals supported development and execution, in addition to [turnaround](#) (TAR) and operational management.

Our familiarity with site work practices, policies, procedures, and standards enabled the recruitment and retention of dedicated professionals. These individuals integrated seamlessly with Shell's direct project and operational teams, allowing for rapid response.

The continued commitment to success and safety by Audubon at Shell's Norco manufacturing complex resulted in effective project development and execution for both small and large projects over many years.
