PROJECT PROFILE T14 FRACTIONATION PLANT

Client: TARGA RESOURCES | Location: MOUNT BELVIEU, TX

Audubon provided <u>detailed design</u>, <u>engineering</u>, <u>procurement</u>, and <u>construction management</u> for <u>Targa</u> <u>Resources' natural gas liquid (NGL) fractionation facility</u> expansion project in Mont Belvieu, Texas.

The maximum gross fractionation capacity of the facility was expanded by 28% to 275,000 BDP, an increase of 60,000 BDP. Audubon achieved an increase of 88,000 BDP for the client, placing the project ahead of schedule and budget.

Project Overview

- Deethanizer fractionation system with associated refrigeration
- 1750 HP reciprocating ethane compressors
- Deethanizer column with reflux and reboiler section
- Liquid treating

EG skid

Scope of Work

- Detailed design
- Engineering
- Procurement
- Construction management
