

PROJECT PROFILE

UTOPIA PIPELINE

Client: **KINDER MORGAN** | Location: **OHIO**

Audubon Companies was contracted to perform the full right-of-way (ROW) scope for the Utopia Pipeline project. The new pipeline facilities connect with and utilize Kinder Morgan's existing pipeline and facilities to move ethane and ethane-propane mixtures eastward to Windsor, Ontario. These ethane and ethane-propane mixtures are used primarily as a feedstock for producing plastics for the petrochemical industry. The Utopia East pipeline system has a current capacity of 50,000 barrels per day (bpd) and is expandable to more than 75,000 bpd.

Project Overview

- 220 Miles
- Ethane Propane
- 14 Counties Across Ohio
- Acquired 100% Without Condemnation

Scope Of Work

- Line List
- Preliminary Title
- Survey Permission
- Easement Acquisition
- Ministerial Permitting
- Construction Support
- Construction Staking and As-Builts
