Audubon

Who We Are

Audubon began in 1997 with a vision—to deliver repeatable project success and contribute to a better tomorrow. Since then, we have built a reputation as a leading provider of engineering, procurement, construction (EPC), construction management (EPCM), fabrication (EPFC), consulting, and technical services for the energy, chemicals, renewables, power and utility, and industrial markets.

Today, Audubon is recognized by customers and employees alike for its flexibility and project execution. We apply technological innovation and agile problem-solving to overcome complex challenges with multidisciplinary capabilities and extensive experience.

- 1,800+ employees
- 15 global locations
- 25+ years of project results

Audubon

Our Commitment to Safety

At Audubon, we firmly believe that people are at the center of what we do. The health of our co-workers and clients is of the utmost importance to us. Whether in the office or on a job site, we are committed to creating an incident-free environment that complies with ever-evolving procedures and regulations. Our comprehensive strategy is based

on three key elements—leadership, staff accountability, and observation. Safeguarding the workplace begins with teamwork and leadership, and everyone has the authority and obligation to stop any work believed to be hazardous.

Audubon

Our Integrated EPC Framework

Engineering, procurement, and construction activities are the cornerstones of a project's development—making their contractor selection pivotal to project outcomes. Audubon's EPC strategy leverages the unmatched expertise within our diverse disciplines, resulting in cohesive project execution.

Our engineering, fabrication, construction, and field groups collaborate throughout each project to deliver seamless service to our clients, from surveying and permitting to engineering and design to assembly and installation to startup and commissioning.

AUDUBON EPC BENEFITS

- Streamlined project management
- Single point of accountability
- Minimum cost risks + schedule delays
- Enhanced stakeholder communication + coordination
- Reduced administrative burden

By entrusting us to deliver the entire project life cycle, you can focus on your core operations, confident in the knowledge that your project is in expert hands.

Audubon

Engineering

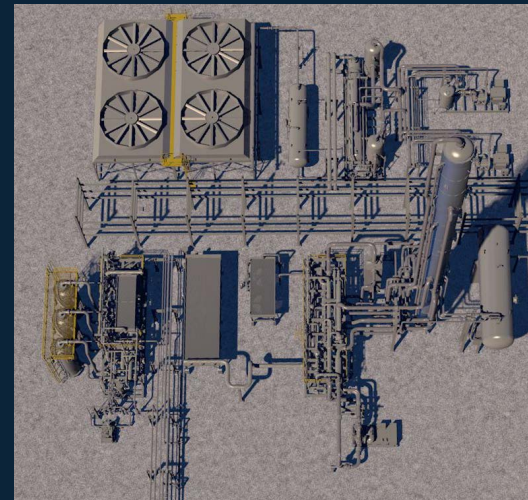

Audubon's engineering group provides full-service multidisciplinary engineering and project management from conceptual front-end engineering and design (FEED) studies through detailed design and construction packages.

SERVICES

Conceptual design | FEED studies |
Detailed design | Construction drawings

CAPABILITIES

- Project management
- Project controls
- Process
- Mechanical
- Piping design
- Civil + structural
- Electrical + instrumentation
- Automation + controls
- 3D modeling

Audubon

Procurement + Logistics

Audubon's supply chain division brings life-cycle procurement services from estimating, requisitions, and quotation solicitations to purchasing and expediting. Our knowledgeable professionals are experienced in contract negotiation for complete project delivery.

SERVICES

Quotations | Purchasing | Expediting |
Transportation

CAPABILITIES

- Purchase requisitions
- Purchase orders
- Contract negotiation
- Scheduling
- Vendor inspections
- Logistics

Opero Energy

Fabrication

Opero Energy, a subsidiary of Audubon, delivers integrated processing solutions to the energy industry. Offering a wide range of options for natural gas processing and treating, we provide customized process solutions that ensure a maximum return on investment.

SERVICES

Modular designs | Fabrication | Process technologies

CAPABILITIES

- Modular design + fabrication
- Process technology solutions
- Cryogenic, amine, stabilization, dehydration systems
- Structural steel fabrication
- Piping fabrication (carbon steel + stainless steel)
- Mechanical assembly
- ASME-certified pressure vessel fabrication
- Electrical + instrumentation
- Insulation + heat tracing
- Factory acceptance testing
- Quality assurance + control (QA/QC)

Audubon

Construction

Audubon excels in direct-hire construction services. Defined by self-performance, skilled craft labor, project cohesion, and the highest safety and quality standards, our construction projects reflect the excellence and expertise that Audubon is well-known for across industries.

SERVICES

Comprehensive premobilization | Thorough site preparation | Structured execution

CAPABILITIES

- Deep foundations
- Civil construction
- Structural steel
- Mechanical equipment
- Piping
- Instrumentation, electrical, controls
- Commissioning
- Demolition

Audubon

Field Services

Audubon's field group provides all the services required for operators to transition from a construction project to a fully functioning facility.

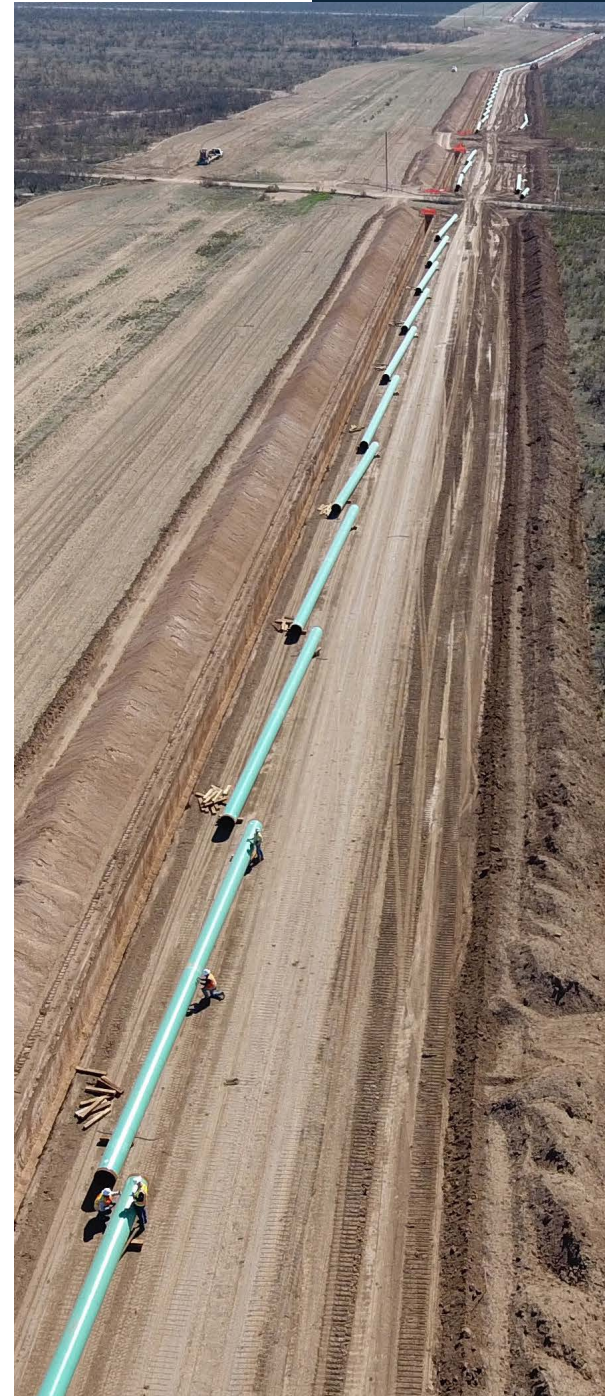

The field services team provides precommissioning and commissioning services, including plant startup and maintenance.

SERVICES

Integrity | Compliance |
Performance

CAPABILITIES

- Precommissioning
- Commissioning + startup
- Operating procedures
- Operator training
- Field maintenance
- Survey
- Environmental
- Permitting
- Emissions modeling
