

Audubon Integrated Management System (AIMS)

"AIMS was user friendly and provided insight on the progress and traceability throughout the project construction phase. Documentation from the inspection team was well organized within the system and easy to identify. Overall, the team had a good experience with the system, with limited issues."

Sr. Project Manager

Access your critical inspection data and information in real time on a single platform.

AIMS delivers a comprehensive solution that ensures our clients remain fully informed and engaged throughout their inspection projects. Unlike many systems that lack real-time visibility, AIMS offers complete transparency by providing immediate updates and access to every facet of project progress. This allows our clients to monitor and manage their projects with maximum clarity and insight.

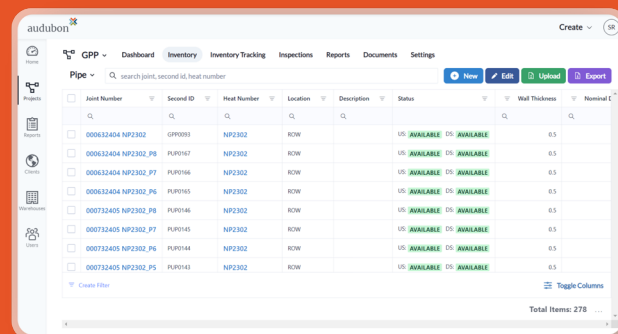

Enhanced visibility, improved project coordination, + document management

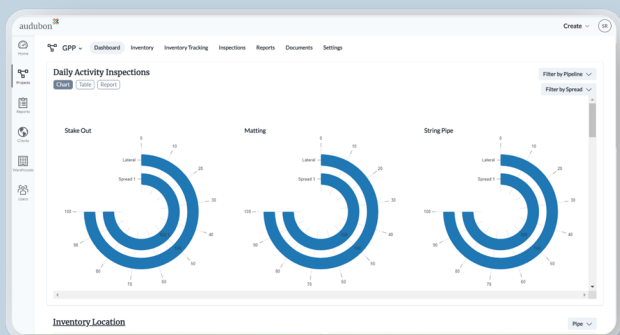

AIMS is a powerful tool that enhances your experience by providing real-time access to essential project information. With AIMS, you can effortlessly track the status and location of materials, ensuring you are always up to date on inventory availability and material requests.

The platform includes inspection tracking and offers timely updates on inspection schedules and results, helping maintain quality and compliance throughout your project. AIMS streamlines document management, allowing you to organize and access all necessary files and records from a single, secure location. This centralization simplifies document handling and improves accessibility.

AIMS also facilitates better communication and collaboration by providing you and your team with clear access to project information, enhancing coordination and project efficiency.
