EPC Solutions

Engineering | Procurement | Construction

Who We Are

Designing, building, and sustaining **what matters**

EPC | EPCM | EPFC

Founded in 1997, Audubon Companies LLC provides engineering, procurement, construction (EPC), consulting, fabrication, and field services to energy and industrial operators across the globe. We bring agile, collaborative project solutions—dedicated in every phase to safety, quality, and results. For our clients' most important assets and most challenging problems, Audubon delivers.

- 2,500+ employees
- 16 global locations
- 25+ years of project results

Our Commitment to Safety

At Audubon, we firmly believe that people are at the center of what we do. The health of our co-workers and clients is of the utmost importance to us. Whether in the office or on a job site, we are committed to creating an incident-free environment that complies with ever-evolving procedures and regulations. Our comprehensive strategy is based

on three key elements—leadership, staff accountability, and observation. Safeguarding the workplace begins with teamwork and leadership, and every employee has the authority and obligation to stop any work believed to be hazardous.

Our Integrated EPC Framework

Engineering, procurement, and construction activities are the cornerstones of a project's development—making their contractor selection pivotal to project outcomes. Audubon's EPC strategy leverages the unmatched expertise within our diverse disciplines, resulting in cohesive project execution.

Our engineering, fabrication, construction, and field groups collaborate throughout each project to deliver seamless service to our clients, from surveying and permitting to engineering and design to assembly and installation to startup and commissioning.

BENEFITS

- Streamlined project management
- Single point of accountability
- Minimum cost risks + schedule delays
- Enhanced stakeholder communication + coordination
- Reduced administrative burden

By entrusting us to deliver the entire project life cycle, you can focus on your core operations, confident in the knowledge that your project is in expert hands.

Engineering

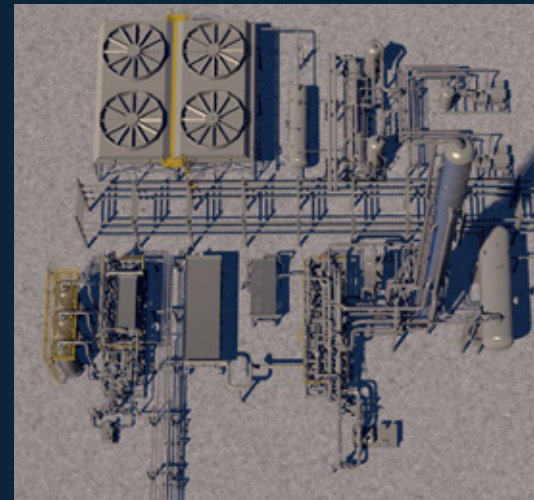

Audubon's engineering group provides full-service multidisciplinary engineering and project management from conceptual front-end engineering and design (FEED) studies through detailed design and construction packages.

SERVICES

Conceptual design, FEED, detailed engineering, detailed design, construction drawings

CAPABILITIES

- Project management
- Project controls
- Process
- Mechanical
- Piping design
- Civil + structural
- Electrical + instrumentation
- Automation + controls
- 3D modeling

Procurement + Logistics

Audubon's supply chain team brings life-cycle procurement services from estimating, requisitions, and quotation solicitations to purchasing and expediting. Our knowledgeable professionals are experienced in contract negotiation for complete project delivery.

SERVICES

Quotation, purchasing, expediting, transportation

CAPABILITIES

- Purchase requisitions
- Purchase orders
- Contract negotiation
- Scheduling
- Vendor inspection
- Logistics

Fabrication

Opero Energy delivers integrated processing solutions to the energy industry. Offering a wide range of options for natural gas processing and treating, we provide customized process solutions that ensure a maximum return on investment.

BENEFITS

Advanced process technologies, in-house capabilities on the Gulf Coast, streamlined site integration

CAPABILITIES

- Modular design + fabrication
- Cryogenic, amine, stabilization, dehydration systems
- Structural steel fabrication
- Piping fabrication (carbon steel + stainless steel)
- Mechanical assembly
- ASME-certified pressure vessel fabrication
- Electrical + instrumentation
- Insulation + heat tracing
- Factory acceptance testing
- Quality assurance + control (QA/QC)

Construction

Audubon excels in direct-hire construction services. Defined by self-performance, skilled craft labor, project cohesion, and the highest safety and quality standards, our construction projects reflect the excellence and expertise that Audubon is well-known for across industries.

BENEFITS

Comprehensive premobilization, thorough site preparation, structured execution

CAPABILITIES

- Deep foundations
- Civil construction
- Structural steel
- Mechanical equipment
- Piping
- Instrumentation, electrical, controls
- Commissioning
- Demolition

Field Services

After construction is complete, Audubon provides all the activities required for operators to transition to a fully functioning, high-performing facility.

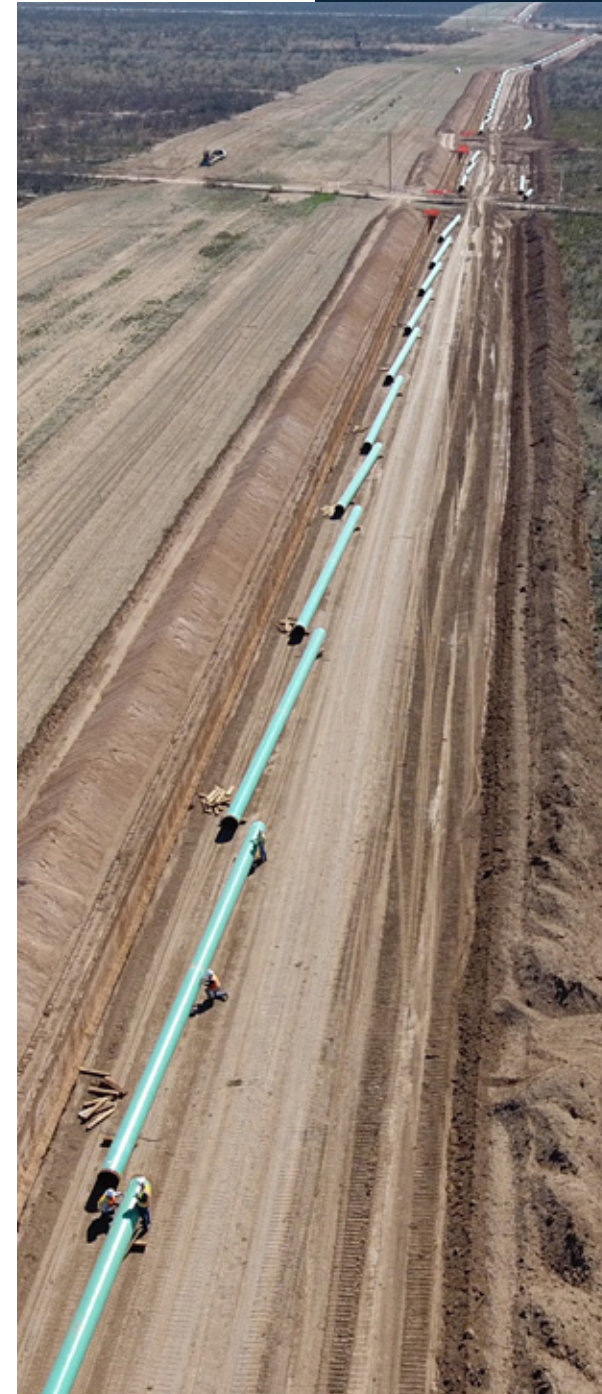

We apply real-world experience, domain knowledge, and cutting-edge technologies to mitigate risk and manage compliance.

BENEFITS

Reduced risk, regulatory compliance, optimized performance

CAPABILITIES

- Precommissioning
- Commissioning + startup
- Operating procedures
- Operator training
- Field maintenance
- Surveying
- Environmental
- Permitting
- Emissions modeling

We design, build, and sustain **what matters.**
